-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: on page 3, last line, after "another", insert a period.

Appropriate correction is required.

### *Claim Objections*

2. Claim 1 is objected to because of the following informalities: in line 18, "inset" should be changed to –insert–. Appropriate correction is required.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Johnson 1,394,259 or Johnson 1,566,965 in view of Weinraub 6,725,692.

Both Johnson references teach padlock casings 5 having a keyhole 10 and shackle holes to receive a cable shackle (20; 16 respectively) encased within a tubular sheath comprised of a series of round projections and curved recesses with a fixed end (at 24; at 19) engaged within the casing and a removable bolt end (at 37; at 31) with an annular

groove (at 31; at 27) to receive lock means (15; 15) therein. Johnson fails to teach a fixing pin in a vertical side wall of the casing to engage the fixed end of the shackle.

Weinraub clearly teaches the well known use of a fixing pin 39 in a vertical side wall hole 40h to engage the fixed end of a shackle 38a. It would have been obvious to one of ordinary skill in the art to modify the casing of Johnson '259 or '965 by providing a substitute fixing means for the fixed shackle ends as taught by Weinraub to be well known in the art as a functional equivalent.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the cited art showing a series of members forming a sheath for a lock cable.
